

# We are looking for a Laser Cutter Operator

Are you interested in versatile production work where the right attitude is more important than previous experience? Would you like to work in a growing and developing metal industry subcontracting company manufacturing various steel sheet structures?

**We are looking for a laser cutter / laser operator** for a fixed-term employment of 3–6 months at our factory in Muurame, starting as agreed. After the fixed-term period, there is a possibility for a longer-term employment.

Previous experience is not required, but it is considered an advantage.

Work is carried out in two or three shifts depending on the production situation.

## We expect from you

- A positive and responsible working attitude
- Willingness to learn and develop your skills
- Accuracy and carefulness
- Readiness for shift work

## Your tasks will include, for example

- Operating a laser cutting machine
- Process quality control
- Ensure quality parts and correct quantities are produced
- Sorting parts and preparing them for the next production stage
- Forklift operation for handling materials and finished parts
- Daily and weekly machine maintenance
- Ensure working area is kept clean and tidy

## Considered an advantage

- Experience in laser cutting or metal industry work
- Ability to read technical drawings
- Forklift driving skills

## Why work with us?

- We provide full training – previous experience is not necessarily required
- You will work with modern laser cutting machines
- Clear job responsibilities and well-functioning production
- A friendly and skilled team will help you get started
- A stable workplace in the metal industry
- Salary based on skills and experience, at least according to the Technology Industry Collective
